

# Reading GERB HR Data in Satpy

We developed a Satpy reader for the GERB HR data product. Please find it at the following URL: [https://github.com/pdebuyl/satpy/tree/add\\_gerb\\_l2\\_hr\\_h5](https://github.com/pdebuyl/satpy/tree/add_gerb_l2_hr_h5) (feel free to ask Pierre de Buyl - email pierre.debuyl AT-sign meteo.be) if you need more information for configuration).

An example notebook for reading and resampling the data is available: [Jupyter file](#) and [PDF preview](#)
