Progress Meeting WP3

Christine Aebi, Almudena Velazquez Blazquez,
Edward Baudrez and Nicolas Clerbaux

21 February 2025

Overview WP3

Work Package number:	WP3
Work Package Title:	Accuracy assessment of unfiltered radiances L2 BM-RAD product.
Responsible entity:	RMIB
WP responsible person	Aebi
Project phases (0,A,B,C,D,E):	E
Beginning and end dates of WP	01.12.2024 – 31.12.2025
Total FTE allocated to the WP	13 PM (1.08 FTE)
Objectives of the WP: Quantitative evaluation of the L2 BM-RAD radiance product, so establishing input data quality for the BBR flux estimation.	
Inputs: <ul style="list-style-type: none"> Tools from WP1. L2 BM-RAD data (commissioning and beyond) CERES (SSF) and GERB (HR) data Description of work and schedule: <ul style="list-style-type: none"> Basic, qualitative, evaluation of the BM-RAD product, including visualization (context from MSI images). Comparison unfiltered radiances with the Earth targets defined in WP1. Comparison with coangular co-incident observations from GERB and CERES to assess absolute level (calibration), and scene type consistency (spectral response/unfiltering). Long term stability monitoring of the instrument response will be established using stable Earth targets. Excluded tasks: Deliverables and dates: <ul style="list-style-type: none"> Matched databases of coangular radiances for reference and further analysis (30.06.2025). BBR L2a quantitative assessment report (31.12.2025). Recommendation for BM-RAD processor evolution. Risks: Availability of co-angular collocated observations from CERES RAPS campaigns	

3.1

3.2

3.3

3.4

- Continuation of the monitoring of various parameters.
- Analysis of the level-2 products BM-RAD and BMA-FLX data.
- Analysis of changes per month, per day?
- Continuation of the analysis with GERB and CERES data:
 - GERB is out of the sun avoidance season since middle of October 2024.
 - CERES SSF data are available until 01/08/2024.
- Presentation at the 1st ESA-JAXA EarthCARE In-Orbit Validation Workshop in January 2025.
- Participation at the EarthCARE Validation Workshop in March 2025.

- Continuation of the monitoring of various parameters.
- Analysis of the level-2 products BM-RAD and BMA-FLX data.
- Analysis of changes per month, per day?
- Continuation of the analysis with GERB and CERES data:
 - GERB is out of the sun avoidance season since middle of October 2024.
 - CERES SSF data are available until 01/08/2024.
- ✓ Presentation at the 1st ESA-JAXA EarthCARE In-Orbit Validation Workshop in January 2025.
 - Title: EarthCARE BBR Level 1 Products Assessment within BRAVO Project
- ✓ Participation at the EarthCARE Validation Workshop in March 2025.
 - Abstract sent: EarthCARE BBR Validation Results within the BRAVO Project

Outlook from progress meeting on November 29, 2024

- Continuation of the monitoring of various parameters.
- Analysis of the level-2 products BM-RAD and BMA-FLX data.
- Analysis of changes per month, per day?
- ❖ Continuation of the analysis with GERB and CERES data:
 - GERB is out of the sun avoidance season since middle of October 2024. → Issues with GERB data
 - CERES SSF data are available until 01/08/2024. → Still the same date
- ✓ Presentation at the 1st ESA-JAXA EarthCARE In-Orbit Validation Workshop in January 2025.
→ Title: EarthCARE BBR Level 1 Products Assessment within BRAVO Project
- ✓ Participation at the EarthCARE Validation Workshop in March 2025.
→ Abstract sent: EarthCARE BBR Validation Results within the BRAVO Project

Outlook from progress meeting on November 29, 2024

- ✓ Continuation of the monitoring of various parameters.
 - B-NOM (see next slides)
- ✓ Analysis of the level-2 products BM-RAD and BMA-FLX data. → See next slides
- ✓ Analysis of changes per month, per day? → See next slides
- ❖ Continuation of the analysis with GERB and CERES data:
 - GERB is out of the sun avoidance season since middle of October 2024. → Issues with GERB data
 - CERES SSF data are available until 01/08/2024. → Still the same date
- ✓ Presentation at the 1st ESA-JAXA EarthCARE In-Orbit Validation Workshop in January 2025.
 - Title: EarthCARE BBR Level 1 Products Assessment within BRAVO Project
- ✓ Participation at the EarthCARE Validation Workshop in March 2025.
 - Abstract sent: EarthCARE BBR Validation Results within the BRAVO Project

Evaluation of the B-NOM product (L1)

- Containing filtered shortwave and longwave radiances
- No additional information about clouds, snow albedo, etc.
- Available in three different resolutions (small, standard, full)
- Data availability:
 - Baseline AC: 27/07/2024 – 13/01/2025
 - Baseline AD: 13/01/2025 – today

- B-NOM

SW and **LW**
filtered radiance
integrated over
three resolutions:

Resolution	along-track (km) x across-track (km)
Small	10 x 5 (configurable)
Standard	10 x 10
Full	Nadir: 10 x ~17 Off-nadir: 10 x ~ 28

- B-SNG

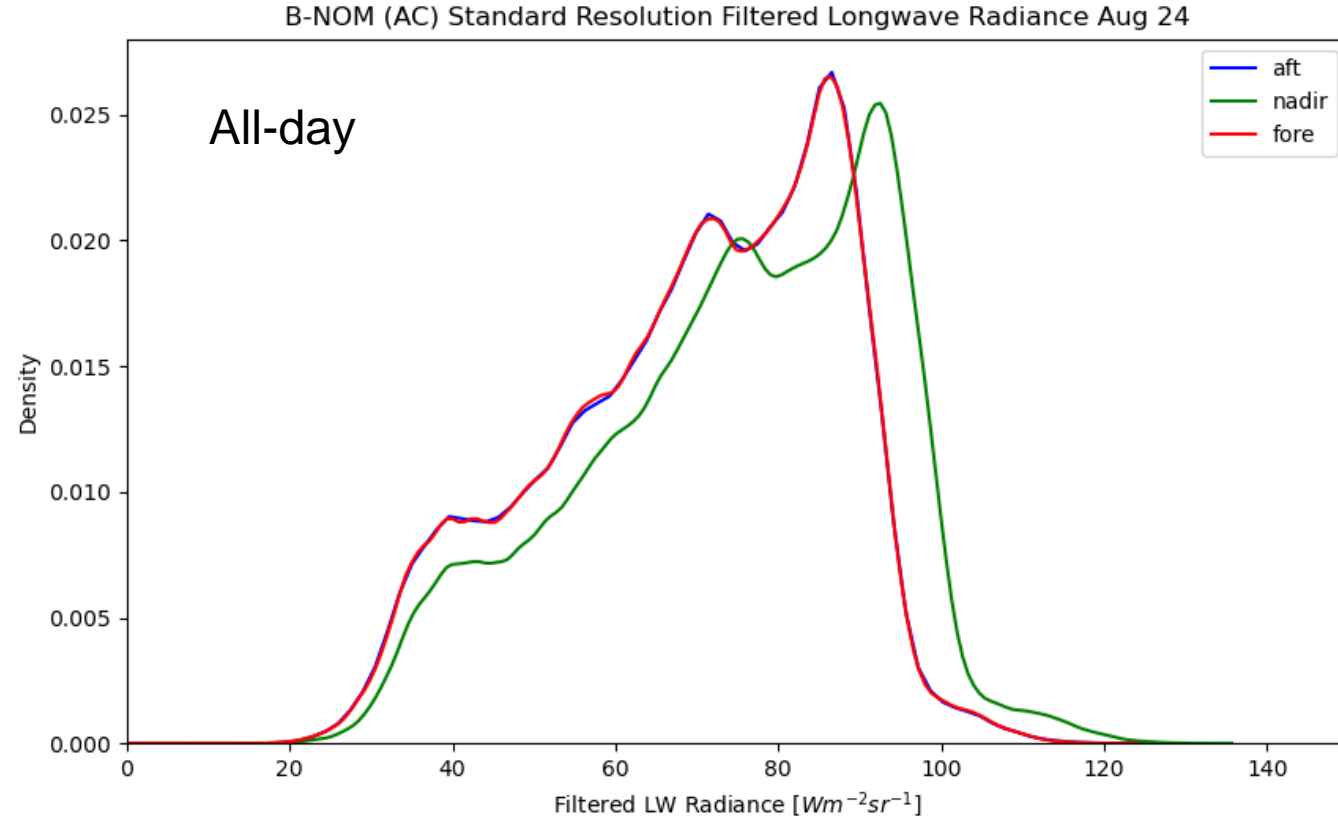

SW and **TW** filtered
radiance at pixel level

Filtered Radiances

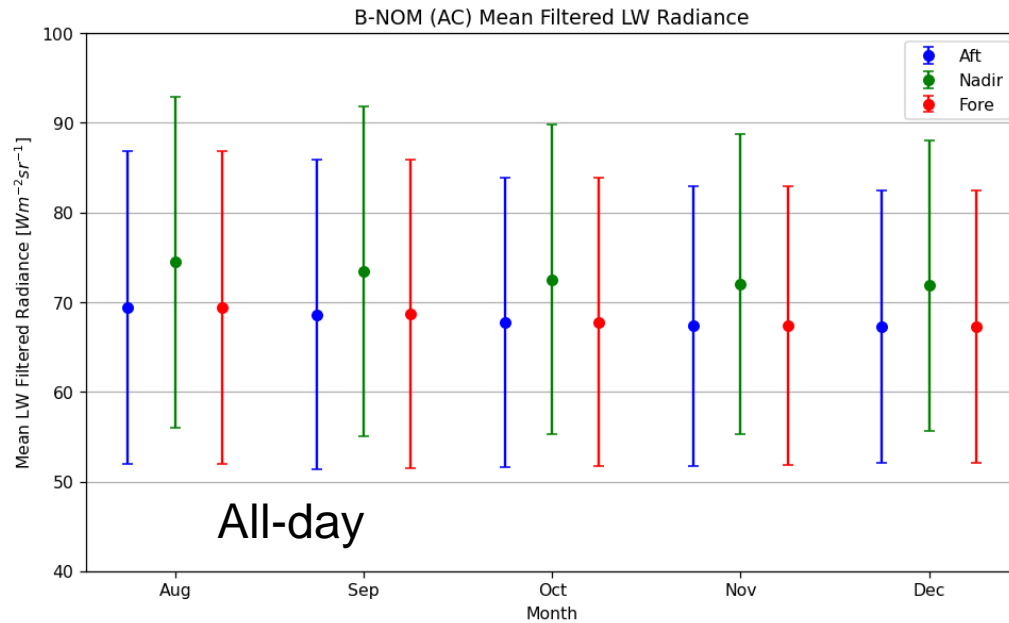

Distribution B-NOM LW Radiance, August 2024

Standard Resolution,
Baseline AC

View	Mean [$\text{Wm}^{-2}\text{sr}^{-1}$]	Std [$\text{Wm}^{-2}\text{sr}^{-1}$]	Median [$\text{Wm}^{-2}\text{sr}^{-1}$]
Aft	69.41	17.42	71.85
Nadir	74.45	18.43	76.75
Fore	69.40	17.40	71.82

Overview WP3

Work Package number:	WP3
Work Package Title:	Accuracy assessment of unfiltered radiances L2 BM-RAD product.
Responsible entity:	RMIB
WP responsible person	Aebi
Project phases (0,A,B,C,D,E):	E
Beginning and end dates of WP	01.12.2024 – 31.12.2025
Total FTE allocated to the WP	13 PM (1.08 FTE)
Objectives of the WP: Quantitative evaluation of the L2 BM-RAD radiance product, so establishing input data quality for the BBR flux estimation.	
Inputs: <ul style="list-style-type: none"> Tools from WP1. L2 BM-RAD data (commissioning and beyond) CERES (SSF) and GERB (HR) data Description of work and schedule: <ul style="list-style-type: none"> Basic, qualitative, evaluation of the BM-RAD product, including visualization (context from MSI images). Comparison unfiltered radiances with the Earth targets defined in WP1. Comparison with coangular co-incident observations from GERB and CERES to assess absolute level (calibration), and scene type consistency (spectral response/unfiltering). Long term stability monitoring of the instrument response will be established using stable Earth targets. Excluded tasks: Deliverables and dates: <ul style="list-style-type: none"> Matched databases of coangular radiances for reference and further analysis (30.06.2025). BBR L2a quantitative assessment report (31.12.2025). Recommendation for BM-RAD processor evolution. Risks: Availability of co-angular collocated observations from CERES RAPS campaigns	

3.1

3.2

3.3

3.4

- Continuation of the monitoring of various parameters in L1 and L2 (including new baseline-releases).
- Continuation of the analysis of changes per month or even per day.
 - Will there be a reprocessing with the new baseline for all data (e.g. for B-NOM AD)?
- Continuation of the analysis with GERB and CERES data:
 - GERB is out of the sun avoidance season since middle of October 2024, but has issues.
 - CERES SSF data are available until 01/08/2024.
- Participation and poster presentation at the EarthCARE Validation Workshop in March 2025.
- Analysis of the ratio between BBR and MSI-based BBR-like data (open point from WP2).
